CAMUNDA

When considering the migration to Camunda 8, it is important to apply a methodology to your migration with skilled individuals to help you with the process.

Camunda's Migration Evaluation Workshop offers a collaborative, no-cost session for Enterprise customers, where our experts partner with your technical and business team.

Together we can dive into Camunda 8 and what it offers, hands-on experiences with the platform, discussions around migrating and what makes sense for your organization.

✓ **Build skills in Camunda 8 while migrating for the best possible outcome**

✓ **Work directly with experienced Camunda migration consultants providing best practices and recommendations specific to your Camunda implementation**

✓ **Build a migration strategic plan to optimize your success when migrating to Camunda 8**

✓ **Get a high-level overview of deployed Camunda 7 projects and their migration requirements**

Build your Migration Strategy: Camunda Migration Evaluation Workshop

Gain Knowledge

Before embarking on the migration journey, customers should evaluate Camunda 8 to understand how its powerful features can help meet their project needs and guide a successful transition.

The Camunda Consultant helps the customer:

- Recognize the added value of Camunda 8
- Understand the technical implications of Camunda 8
- Understand common migration approaches
- Gain first experiences with Camunda 8

Shape your Camunda 7 to 8 Migration

One of the key roles of the workshop is to transfer knowledge which includes:

- Why Camunda 8
- Platform Overview
- Demonstration
- Migration Strategies (Application Level & Operational Level)
- Best Practices
- Camunda 7 vs. Camunda 8
- Camunda 8 Hands-On (Connectors, Job Workers & Advanced FEEL)

The workshop spans approximately two (2) half-days:

- Day 1: Product and Migration presentation
- Day 2: Hands-on POC with live translation of one of your processes

Workshop Prerequisites

- SaaS account for Camunda 8
- Detailed information about current configuration
  - Camunda Engine version
  - Embedded vs. Remote vs. Shared Engine
  - Implementation Type of Service Tasks
  - BPMN and DMN Files are shared

Expected Attendees

- Center of Excellence (CoE) – Day 1
- IT Architects – Day 1
- Developers – Days 1 & 2

Next Steps

Once you've explored Camunda 8's capabilities, it's time to assess your existing implementation to identify integration points and required changes—like custom UIs or reporting tools.
